

Scenes and Persons in the Current News

1—The new destroyer Farragut launched at Quincy, Mass. 2—Royal marines on review when the British fleet visited the West Indies. 3—Col. Eddie Rickenbacker, famous war ace, testifying before the senate post office committee.

This "Circle Plane" may replace the runabout in the average American family, according to the designers. The plane has an umbrella-like wing and can be landed at a 90-degree angle in a 25-foot area. It can travel 135 miles per hour, and comes down to earth slower than a parachute.

Photograph shows Panchen Lama (Living Buddha), the Cultural Commissioner for the Western Border of China, during his forty-nine days of uninterrupted prayer for the departed spirit of Dalai Lama, the Tibetan ruler, who died at Lhasa in December. The Panchen Lama, who was expelled from Tibet by the Dalai Lama in 1924, is in Nanking planning to regain his lost authority.

The Norwegian freighter Tal Yin ran aground on Point Reyes, Calif., while trying to make port with 12 passengers and a crew of 45.

ITEMS OF INTEREST

Brief Resume of Happenings
of the Week Collected for
Our Readers

Gold Hill—Depositors of the defunct Brookings State bank will soon receive the fifth and final dividend of 15 per cent on claims against the savings department.

Astoria — The last cent of the bonded debt of Astoria will be paid off April 1. In 1914 the county made a bond issue of \$400,000 for highway improvement.

Eugene — Sixteen Chinese pheasants, all show birds, have been killed by a dog at the Eugene state game farm. The birds were valued at \$200 and included 12 hens and four cocks.

Eugene — Out of a total of 23 school districts in Lane county eligible to receive funds under the educational relief act, 14 have made application to the county school superintendent.

Eugene—Lane county banks will pay the county one-fourth of 1 per cent on deposits of \$1,000 or more, according to an agreement with the county court. This will bring the county about \$150 a year.

Salem—During the present month the game commission, according to Matt Ryekman, superintendent of hatcheries, has liberated 310,000 four-inch rainbow trout. Approximately 225,000 were liberated in the Deschutes river.

Klamath Falls — William Klitridge, ranch owner of the great Klamath marsh, reports that more than 15,000 turkeys will be raised on the marsh this year. They will fatten on grass-hoppers and the myriad of other insects.

Willamina — Rex D. Horton has been reelected principal of the Willamina schools. Present teachers also have been reelected for the coming year. According to a report of the school board, Willamina will not need federal relief for its schools.

Sherwood—The old German Evangelical Lutheran church at Sherwood, together with the parsonage and barn, is being dismantled. The material will be put into a farm home. The building is one of the first churches erected in Sherwood.

Eugene — Persons who are receiving a county pension or those who have private work bringing them an income are not entitled to the government subsistence garden seeds, according to O. E. Crowe, secretary of the Lane county relief committee.

Baker—Only four school districts of Baker county have taken advantage of the opportunity to secure federal funds under the educational relief act, according to Mrs. Maybelle H. Romig, county school superintendent. The districts are Whitney, Cornucopia, Sumpter and Union High of Hereford.

Blooms Jostle Spring

Eugene—First Lane county rhododendrons of the season were brought to Eugene from the Florence section on the coast. These flowers seldom bloom in this section before May 20.

Sawmill to Employ 30

Joseph—McKinley sawmill, on the outskirts of Joseph, will probably start running about April 1, giving employment to approximately 30 men. A. M. McKinley, owner, plans to cut 3,500,000 board feet this season.

Quicksilver Mine Producing

Redmond — Twelve persons are employed at the Mother Olde quicksilver mine, which started operation a few days ago. C. W. Washabaugh, operator of the mine, reports. He said the advance price of quicksilver would cause several of the mines in the Blue mountains to start operation.

Treasurer's Call Will Mean State Cash Basis

Salem — State Treasurer Rufus C. Holman, issued a call for all outstanding unpaid general fund warrants, \$535,363.64. The call, effective Wednesday, will place the state of Oregon on a cash basis again, lacking two days of a year when first warrants were registered.

Press of State for Tongue Point

Astoria — Editorial comment by Oregon newspaper editors throughout the state reveals that support of the Tongue Point naval base is not only statewide, but energetic, was the conclusion reached by the local Tongue Point naval base committee following receipt of much publicity on the project in the Oregon press.

Possibility of Places
of Fire and Brimstone

The discovery of the presence of sulphur in the sun is not wholly unexpected. For many years we have been hearing about "fire and brimstone" and we have concluded that fire and brimstone are the hottest combination in existence. But where was there any sulphur, or brimstone, except on the earth? Astronomers have searched outer space with telescopes. They have found various elements such as tungsten and fluorine, but no brimstone. Preachers have confessed they did not know where this place of fire and brimstone was located, and in later years some of them even began to doubt if it was real, though others stoutly insisted that it was.

But now Princeton university astronomers, with infra-red rays and highly sensitive plates, have obtained photographs showing more than 20 sulphur lines and confirming the theory advanced by a German astronomer some years ago that there is sulphur in the sun. So there must be some truth in it. The sun, the hottest spot science has yet been able to find anywhere, is fire and brimstone. And it is only 93,000,000 miles away. And if the sun is not "the" place of fire and brimstone, that does not prove that no such place exists. For it is now known that sulphur is not simply an element of the earth, but an element widely distributed through space.—St. Louis Globe-Democrat.

World's Oil Supply

Petroleum in known deposits and at the rate of the present consumption is sufficient to last the world for the next 30 centuries, according to Dr. Gustave Egloff, of Chicago. With only 2,000,000 acres of oil land producing in the United States alone, Doctor Egloff points out that America has 1,100,000,000 acres of possible oil land that is yet to be explored and developed.
